#### **DETAILED ACTION**

This application is in condition for allowance except for the following formal matters:
 Prosecution on the merits is closed in accordance with the practice under Ex parte

 Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

# Specification

The following discrepancies in the application has been brought to the examiners attention.

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The claim language includes the term "mobile". The examiner found support for the synonymous term "portable" on Column 4 lines 13-20 however the examiner was informed that the specification must be amended to include the term "mobile" to have proper antecedence within the specification for the claim terminology.

### Oath/Declaration

3. The reissue oath/declaration filed with this application is defective because it fails to contain a statement that "all errors which are being corrected in the reissue application up to the time of filing of the oath or declaration arose without any deceptive intention on the part of the applicant." See 37 CFR 1.175 and MPEP § 1414.

Application/Control Number: 11/437,005 Page 3

Art Unit: 2111

### Claim Objections

4. The claim amandment is filed 9/25/06 is non-compliant because all claims 1-20 need to be presented with proper status identifiers.

## Allowable Subject Matter

- 5. Claims 1-20 are allowed.
- 6. The following is an examiner's statement of reasons for allowance: The expansion device being able to directly access the plug in data storage is determined to be the patentable feature (i.e. applicants bus 912). An updated broadened search was conducted and a reference that appeared to teach the patentable feature was found however upon closer review was found to not teach the patentable feature.

Reference PN 5,928,362 was found that teaches an expansion card and a ROM that connect to a computer through a shared interface however the only direct connection between the ROM and the expansion card is a control line and is not used by the expansion card to "access" the ROM..

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul R. Myers whose telephone number is 571 272 3639. The examiner can normally be reached on Mon-Thur 6:30-4:00.

Application/Control Number: 11/437,005 Page 4

Art Unit: 2111

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Rinehart can be reached on (571) 272-3632. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
